Rynna-line - Gutter Refurbishment Case Study

Alloa Academy, Alloa

CGL Systems worked closely with TEAM Ltd to produce and supply 785lm of our Rynna-line Gutter Refurbishment Solution.

Due to the site experiencing severe leaks, which caused site disruption and safety concerns, CGL and TEAM Ltd were called to site and quickly identified the root cause of the leaks to be the degradation of the existing gutters and stop ends. Recognising the urgency of the situation, the decision was made to conduct a full system gutter re-line to effectively resolve the issues.

Following the initial survey, the client was extremely pleased with the report and instructed TEAM Ltd to install Rynna-line.

Since the works have been complete, the site hasn't experienced anymore leaks.
